

## EOPS - Transitions Program

Victor Sapien

Submitted by Noel Gomez and Camila Acosta

In 2019, Victor approached the EOPS and Transitions Program for assistance in enrolling in school. He was looking for HOPE. While working full-time, Victor has been able to maintain a very successful academic record, all while taking the time to help his peers. During the 2019 summer session, Victor would take the time to help his classmates with assignments. He would ensure that they had a grasp of the technology expectations of the class and program so that his classmates would be able to succeed in the summer and future semesters. Victor even carved out time to contribute to SBCC as the Student Ambassador for Guided Pathways. He is currently majoring in Philosophy with an ambition to transfer to a UC and eventually teach. Victor, all of us in EOPS and the Transitions Program are proud of your academic and personal achievements!
